About the Collaboration for Community Health

Boston Children’s Collaboration for Community Health (the “Collaboration”) was launched in 2018 with the goal of improving the health and well-being of children and families in communities disproportionately impacted by systemic injustices and inequities in health and social determinants of health. The Collaboration achieves this overarching goal by increasing community capacity and advancing child-centered methods, ideas, and investment strategies.

The Collaboration has eight equity-focused strategic initiatives designed to address disparities in the social determinants of children’s health. Within each initiative, the Collaboration partners with “funded partners”: community-based organizations, public agencies, academic institutions, and others.

Focus of this report

This annual report shares highlights from the first year of the new cycle of Birth to Five, Healthy Living, and Family Housing Stability and Economic Opportunity funded partners (2021-2024). It also shares accomplishments from the first year and a half of the Children’s Health Equity (CHEq) initiative.

2022 also marked the end of the first funding cycle for the Mental Health, Youth Support Systems, and Community Trauma Response initiatives (2019-2022). This report highlights their combined accomplishments over the three-year period. A new cycle of initiatives was funded in 2022.

Progress along pathways to change

The Collaboration’s Theory of Change demonstrates the pathways through which our strategic initiatives drive change. Funded partners work through three levers to bring about change, which lead to improvements across three broad domains. Ultimately, these short- and mid-term changes contribute to longer-term goals of healthy children, youth, families, and caregivers. The initiative-level spotlights that follow highlight areas of progress along this pathway.

Elevating work through partnerships

The Collaboration has fostered connections across organizations with shared goals. New and deepened partnerships have resulted in the following:

- Reaching more people by partnering with organizations already trusted by the community.
- Identifying new referral opportunities, aligning referral mechanisms, and coordinating service delivery.
- Improving quality of services by bringing together partners with technical knowledge and those with cultural and linguistic expertise.
- Sharing knowledge between partners, such as inviting partner staff to participate in or deliver trainings.

Setting the stage in Boston: 2022

The Great Resignation impacted program implementation, with most funded partners reporting staffing and retention challenges. Inflation and rising rents created a challenging environment both for securing affordable housing for families and sustainability of nonprofit operations. Childcare shortages exacerbated by the COVID-19 pandemic pose significant barriers to connecting families with early childhood programs.
Who we are reaching

The Collaboration has engaged more than 9,000 children, parents, families, residents, and providers across 22 Boston neighborhoods and more than 50 other cities and towns across the state.

More than half of the participants with Boston zip codes live in Roxbury or Dorchester. Key communities include neighborhoods with the highest childhood poverty rates.

Includes 2021-2022 data from Birth to Five, Healthy Living, Family Housing Stability and Economic Opportunity, and Children’s Health Equity funded partners only.

Centering equity from grants to outcomes

In its effort to address historic and systematic racial inequalities in the City of Boston, the Collaboration seeks to lift up organizations led by individuals of color and dedicated to supporting communities of color. Investing in organizations committed to addressing racial inequities is the first step of centering equity in the Collaboration’s work.

❖ 82% of funding is going toward communities of color and other underserved communities**

❖ 45% of funding is supporting organizations led by people of color**

**Data are from grant applications and include Cycle 2 funded partners only. People of color-led is defined as ≥75% of the highest-paid staff members identify as people of color and ≥50% of the Board are people of color. Five organizations are excluded from calculations due to incomplete data.

Funded Partners utilize socio-demographic data collected for grant reporting to:

❖ Determine whether services reach intended populations, including communities historically denied equitable access to resources
❖ Understand differences in outcomes by sociodemographic group
❖ Apply for additional funding opportunities

Equity Impact

Funded Partners are supporting people of color’s mental wellness, increasing cultural capacity, and creating nourishing spaces in communities of color.

Funded Partners are increasing people of color’s ownership of the built environment, increasing educational opportunities, and supporting youth to lead community programming.

Spotlight on Special Initiatives

Over the last year, the Collaboration extended flexible funding opportunities to respond to emerging needs and support organizations with innovative approaches to improving child health. Below, we describe progress made possible by this funding.

Advocacy

Health Care For All led advocacy efforts to promote policies that are responsive to the health care needs of children and families, including the MassHealth 1115 Waiver and “Cover All Kids” bill.

Urban College Boston enrolled its sixth cohort of 15 fellows in the Certificate in Advocacy and Leadership Program in partnership with Vital Villages.

Funding for Emergent Needs

Local Initiatives Support Corporation Boston launched a small business growth capital fund and secured additional funding.

Heading Home made progress toward developing permanent housing for 20 families in Dorchester and secured additional funding.

Massachusetts Housing Investment Cooperation is providing a loan to City Fresh Foods to scale their employee-owned business model.
$1.45\text{m}$ in Year 1 funding 
(6.73\text{m} in total funding since 2018) 

15 funded partners 

>5,000 community members engaged 

Common programmatic approaches 

- Train early childhood educators and providers in evidence-based practices 
- Build caregivers’ parenting skills and confidence 
- Screen for concerns with children’s social-emotional development 

Funded partners built on work from Cycle 1 (2018-2021) in several ways: formalizing established partnerships; integrating the endorsement system statewide and expanding to Spanish-speaking professionals; and increasing enrollment through new partner sites. 

**Partnerships** 

- Funded partners attributed more than 72 new or deepened partnerships to their participation in the Collaboration. 
- The Collaboration has supported advocacy efforts for improved infant and child mental health services, and facilitated statewide cross-sector coordination with the Boston Office of Early Childhood, the Massachusetts Departments of Early Education and Care, Public Health, Mental Health and Children and Families. 

22 events led by advocacy leads 
Advocacy leads are reaching others in the community by teaching them the principles of advocacy work. 

229 educators trained in early education concepts, such as social emotional learning and The Basics Principles 

1,499 opportunities for family learning 
Funded partners offered workshops, coaching sessions, home visits, and playdates for families to engage, learn and connect. 

**Enabling systems and infrastructure:** creating infrastructure for widespread developmental screening 
59 programs using the Ages and Stages Questionnaire for developmental screening 
Funded partners are standardizing screening and referral process across the city, which helps connect families with early intervention and other supports. 

**Child-centered services:** better access to supports grounded in parent experience 
2,482 parents, children, or families engaged in opportunities for learning 
Engagement in wellness workshops, reading programs, and other parenting support programs not only helps parents support their children’s development, but also provides opportunities for parents to connect and prioritize their own wellbeing. 

“The parents we engage with often become parent leaders in the community. [...] The peer model leads to the exponential growth of parents as engaged community members.” 

**Child outcomes** 
574 referrals to services resulting from developmental screenings 
578 children achieving developmental milestones 
Caregivers reported that their children are displaying new skills in the domain of kindergarten readiness. 

**Caregiver outcomes** 
555 caregivers increased parenting capabilities 
Caregivers reported increased self-efficacy, knowledge, confidence, and awareness of resources. 
25 caregivers improved reading quality (such as using dialogic reading with children) or frequency of reading with children 
543 caregivers increased connections with other parents or community supports 

“[I have learned] how to start healing, how to let go, coping skills for stress, how to manage not yelling, how can we help ourselves with perfectionism...” 

**Collective inputs** 

- Funding 
- Number of funded partners 
- Number of community members engaged 

**Levers of change** 

- 22 events led by advocacy leads 
- 229 educators trained 
- 1,499 opportunities for family learning 
- 59 programs using the Ages and Stages Questionnaire 
- 2,482 parents, children, or families engaged 

**Change domains** 

- Partnerships 
- Enabling systems and infrastructure 
- Child-centered services 

**Outcomes**

543 caregivers increased connections with other parents or community supports 

“[I have learned] how to start healing, how to let go, coping skills for stress, how to manage not yelling, how can we help ourselves with perfectionism...” 

**Health equity spotlight** 

- Funded partners are increasing the cultural and linguistic capacity of their projects by: 
  - Addressing cultural and linguistic barriers to developmental screenings and services 
  - Engaging staff that represent diverse languages, geographic locations, cultures and racial/ethnic identities 
  - Working with families to address barriers to the social determinants of health 

**Birth to Five** 

Set children ages birth to five years on a high trajectory for success in school and life 

September 2021 – August 2022
$583,692 in Year 1 funding ($2.93m in total funding since 2018)

12 funded partners

>950 community members engaged

Common programmatic approaches

- Engage children and families in physical activity
- Engage youth in urban farming and support local food systems
- Educate caregivers about healthy eating and active lifestyles
- Distribute free meals and produce to families

Funded partners continuing from Cycle 1 (2018-2021) are scaling up pilot programs, incorporating lessons learned and community members’ feedback, and increasing youth and resident leadership components of their work.

17 nutrition and healthy eating events and 170 urban farming sessions to increase families’ knowledge and skills

178 youth leading healthy living programming

Youth leaders are supported in conducting biking workshops, leading tours of urban farms, and educating peers on improving their healthy behaviors.

Partnerships

- Funded partners leveraged 68 relationships in the first year.
- Partnerships took the shape of co-sponsored community events, in-school programming, referrals, trainings for partner organization staff, and sharing expertise.

Child-centered services: increased engagement in physical activity programs

3,798 youth and adults participating in physical activity

Funded partners focused on meeting youth where they are: improving the quality of recess programming and providing “outdoor adventure” programs at housing developments.

Equitable communities: better access to healthy, local food

29,267 servings of produce distributed and purchased

289 raised beds and grow boxes created for growing local produce

Beyond opportunities for residents to grow their own produce, funded partners expanded access to healthy foods through extended farmers market days, subsidized CSA boxes, and offering low-cost shares in the Dorchester Food Co-op.

Child outcomes

Funded partners share how leadership roles have improved the social-emotional health, skills, and confidence of the 178 youth leaders

“Youth Apprentices who helped teach the [Bike School] program consistently demonstrated positive shifts in their capacity to communicate, lead, socialize, and feel confident in their work.”

Family outcomes

122 Somali-American mothers participating in healthy living conversations changed their attitudes around nutrition, physical activity, and/or mental health

“Women walk in the park and do not just sit. They play with their children in activities. Women know about iron and vitamins and how important they are.”

Healthy Living

Improve resources and opportunities for the adoption of healthy living in communities experiencing inequities in health

September 2021 – August 2022
Family Housing Stability and Economic Opportunity

September 2021 – August 2022

Promote affordable, safe, and quality housing for children and families in priority neighborhoods and foster improved family economic stability and opportunity.

Collective inputs

- $2.89m in Year 1 funding
  ($3.54m in total funding since 2018)
- 6 funded partners
- >2900 residents engaged

Common programmatic approaches

- Engage residents in advocacy efforts to improve availability of affordable housing and protect tenants’ rights
- Build strategic partnerships to improve policymaker knowledge of tenant-driven housing policy
- Provide individual counseling, rental assistance, and/or financial savings programs

Funded Partners built on work from Cycle 1 (2018-2021) to secure policy wins to increase affordable housing, improve tenancy retention and credit scores, and build deeper and more cross-sector partnerships.

Levers of change

- 941 articles and posts about housing organizing and policy
- 1,365 units covered by tenant associations that collaborate and collectively organize for maintaining fair and affordable housing practices

Funded partners engage in activities to implement critical policy, partnerships, and organizational changes to improve economic and housing security for low-income, predominantly racial/ethnic minority families.

Partnerships

- Funded partners collaborated with community-based organizations to host organizing events and provide public testimony.
- They also partnered with schools and lawyers to build awareness of discriminatory housing practices used against communities of color.

Enabling systems and infrastructure: increased affordable homeownership opportunities in Boston

- $229 million secured for new affordable homeownership units through the state’s American Rescue Plan Act funding and the city’s Acquisition Opportunity Program

Child-centered services: improved housing security through family support services

- 716 households participated in individual support services
- Support services include tenants’ rights counseling, rental assistance, and MAHA’s home-buying program.

Equitable communities: residents advocate for fair housing practices and increased affordable housing

- 125 residents engaged in local housing advocacy
- Advocacy efforts include public actions, testimonials, meeting with policymakers, and leadership and organizing meetings.

Outcomes

- Family outcomes
  - 36 participants in a home-buying program reported improvement in stress, psychological, well-being, and/or family well being
  - 156 families secured stable housing

Among these families, 48 families have children in the Boston Public School system and were previously unhoused

- 8 parents secured additional child-care hours, enabling them to continue working jobs with non-standard schedules

“Parents that are stably housed with their children do often share with us anecdotally...that children sleep better, are happier and less anxious, smile and laugh more, and show improvement in how they interact with siblings and parents.”

Family Housing Stability and Economic Opportunity

September 2021 – August 2022

Promote affordable, safe, and quality housing for children and families in priority neighborhoods and foster improved family economic stability and opportunity.

Health equity spotlight

Funded partners strive to address health and racial inequities through new projects focused on improving communities of color’s access to health resources and community ownership.

“At a [Care that Works] gathering [...] organizations agreed to testify at a Boston City Council hearing. After a series of meetings with City Councilors and CTW testimony, Mayor Wu signed ARPA spending plan, which includes $1M for grants to nonprofits to expand childcare access and availability to essential workers [including workers with non-standard schedules].”
$2.84m in Year 1-2 funding ($3.59m in total funding since 2019)

4 funded collaboratives made up of 53 organizations, schools, agencies, and other groups

>950 community members engaged

Common programmatic approaches

- Center leadership and power in communities to address the social determinants of child health
- Increase coordination among service providers and address service gaps

Leveraging CHEq funding, collaboratives have invested in infrastructure to advance their desired systems change. Two collaboratives have hired project managers at the backbone organization to coordinate CHEq work across partners.

Youth Support Systems
May 2019 – April 2022
Support youth-centered and engaged programming and services to promote healthy youth development

$450k funded to date
(May 2019-April 2022)
4 funded partners*
＞1,900 youth engaged

Common programmatic approaches
• Develop or expand programming that supports youth college readiness and employment
• Promote youth leadership and development
• Connect youth with resources for their physical and mental health

Enabling systems and infrastructure: more successful referrals and progress toward sustainability
Hopewell successfully advocated for a moratorium of MA Department of Children & Families case closures for youth over 18 during the pandemic. This ensured continuity of services for these individuals.
Funded partners ensured sustainability of their programs by identifying new funding sources and better defining program models.

Youth-centered services: increased engagement in education and career programs
82 youth connected to a career or training opportunity
Funded partners completed intakes with youth to learn about their goals and connected youth to programs and employers to boost their careers.
403 youth participated in college readiness programming
Funded partners assisted youth in applying to college, including financial support and mentoring.

Young outcomes
Youth achieved career and educational milestones that will promote future financial stability
61 youth gained employment
18 youth increased wages
133 youth enrolled in college
76 youth graduated with college degrees

“Our students have juggled multiple priorities – including work and family obligations – while continuing to pursue their degrees. It is through our partnerships that we are best able to serve our young people.”

“Many of our students persisted to earn their degrees under the most difficult conditions – through the trauma of the pandemic, which disproportionately affected BIPOC students and their families.”
Funded partners helped youth feel supported by the community during a period of uncertainty and isolation
“This video gave me a feeling of hopefulness...seeing someone like me and with my situation was very encouraging for me.”

Partnerships
• Funded partners partnered with high schools, universities, support services (such as Crisis Text Line), employers, national affiliates, and state agencies to provide comprehensive supports to youth.

Advocacy for policies that support youth in foster care
Hopewell successfully advocated for a moratorium of MA Department of Children & Families case closures for youth over 18 during the pandemic. This ensured continuity of services for these individuals.

Health equity spotlight
Funded partners removed obstacles to employment and higher education for youth of color; for example, programs offered internships with fair wages, which reduce disparities in access to these opportunities.
Funded partners also engaged in internal reflection and training to promote diversity, equity, and inclusion (DEI) efforts in their organizations and programs.

“Our focus on DEI internally has allowed us to develop curricula and a program implementation model that is inclusive and designed with Black, Latinx, low-income, and LGBTQ+ young people at the forefront.”

<td><strong>Youth-centered services:</strong> improved access to higher quality programs</td>
<td>Funded partners organized events to promote a stronger sense of community, such as workshops hosted by health champions and service events in areas affected by gun violence.</td>
<td></td>
</tr>
</tbody>
</table>

**Health equity spotlight**

Funded partners expanded access to trauma supports for children and families, particularly in Boston’s Cape Verdean community.

They provided opportunities for parents to be more deeply involved in their children’s lives, particularly for families that have historically been overlooked by the welfare system.

“**Our partnerships have allowed us to increase our understanding of best practices.”**

“**We have been able to better understand the implications related to the community-level and systemic trauma of racial injustice and disparities that exist in our communities.”**

*Cambridge Family & Children Services; Madison Park Development Corporation; Project RIGHT; The Community Builders in partnership with Clark University
